To aid in future Site project planning, please provide details of your needs: Hangar _____

Sun shade _____ Tie down _____ Aircraft Assembly _____ Maintenance work _____

III. VOLUNTEER INFORMATION:

EAA Chapter 124 is operated on volunteer labor in most areas. The site improvements we all now enjoy are the direct result of the effort by members who donated their expertise and labor to past projects. In keeping with that spirit, we hope you will join us on Site work parties and projects so the chapter can continue to grow and prosper. We are always looking for people with knowledge, skills, or tools who can help other chapter members increase their understanding of aviation or to assist them with aircraft related projects. Please review the other side of this page and let us know how you'd like to be involved.

Please contact the officers or board members if you have suggestions for the monthly meeting programs.

The membership directory includes lists of people with various talents/tools they're willing to share with others. Please **circle items below** if you'd be willing to serve as a resource in any of these areas:
